

TANOVA

Out of Sight.
By Design.

Concealed
Waste & Laundry
Systems

FIT are proud to design and develop the Tanova range right here in New Zealand in collaboration with Kiwi designers and makers.

Tanova pull out systems offer space-efficient storage and waste management solutions for all areas of your home.

Bins, hampers and drawers slide away out of sight yet are easily accessed when needed.

Our kitchen bins are easy to clean, with many models having a top mounted cover to protect your cabinet and make it easier to keep clean. We carry extra buckets and lids in stock so, if they get lost (yes! it does happen) or damaged, you are able to purchase replacements.

Multiple bin configurations offer excellent solutions for sorting/storing recyclables from organic kitchen waste.

Several of our laundry hamper units include two baskets to facilitate sorting before washing.

www.fit-nz.co.nz

About Tanova and New Zealand Made

All Tanova waste bin models are designed and assembled in New Zealand, and use New Zealand fabricated and powder coated frames. Models that use 20L and 36L buckets/baskets qualify for the New Zealand Made license. These models are marked with a tick in the New Zealand Made column throughout this book. The entire Tanova laundry range carries the New Zealand Made licence.

The Tanova Waste Family

Tanova Designer Series

- Fully integrated cushioning system for consistent soft closing and smooth-running drawer slides for effortless opening and closing
- Heavy duty 60kg carrying capacity
- Sturdy handles on buckets for easy bin removal
- Handles also hold liners in place and stay attached (so you don't lose them like other liner holders)
- Strong, easy-clean cover which can be used as a shelf if mounted lower in cabinet
- Contemporary Umbra Grey/Charcoal combination, plus Classic White for many models
- 70mm overextension runners extend further beyond edge of benchtop to allow for easy removal of rear bucket
- Models for cabinets from 300mm to 800mm wide, some with category-leading capacity for cabinet size
- Streamlined design for easier cleaning

Tanova Designer Series

Tanova Designer Series 2

Tanova Designer Series 2

- Soft Close and Soft Close with Push to Open models
- Innovative 'everactive' push to open means you can open the drawer just a bit more even if already open
- Comes complete with premium slimline Simlead D drawer (185mm), drawer back, base panel sides and buckets
- Solid-steel powder coated frame with front-fixing points to provide support for the drawer front
- Heavy duty 70kg carrying capacity
- Models in Classic White and in Umbra Grey/Charcoal combination
- Models for cabinets from 300mm to 600mm wide

Cabinet widths are external measurements allowing for 16mm board on each side

TANOVA

Tanova FLEX

Tanova FLEX is a cleverly designed frame and bucket system that sits on your slim wall drawer, ensuring a consistent opening and closing action across the entire kitchen.

- Integrates perfectly with most slim wall soft closing drawer systems
- Easy to install in less than 5 minutes; no templates required
- Integrates with tip-on push to open or servo-drive slimwall drawers
- Tanova FLEX is designed with flat, easy-to-wipe surfaces
- No fiddly clip together or removable parts to get lost or damaged
- Available in Silk White and Umbra Grey for 300mm, 350mm, 400mm and 450mm cabinets
- Primarily designed for 500mm deep cutlery height drawers to keep costs down

Tanova Simplex

Our top selling range, Tanova Simplex fits snugly into most standard cabinet sizes for good stability. The Simplex system runs smoothly on ball bearing slides and its compact size maximises space efficiency. Its heavy duty bin carriage is manufactured from 1.2mm gauge steel for strength and durability.

- Soft close as standard
- 45kg carrying-capacity ball-bearing slides
- Strong, easy-clean cover which can be used as a shelf if mounted lower in cabinet
- Solid folded and welded door bracket
- Contemporary Umbra Grey/Charcoal combination
- Some models also available in Classic White
- Some models available with Push to Open function

Tanova Simplex

Tanova Simplex Plus

All Simplex Plus models run on soft close undermount runners. Simplex Plus is comparable to the Simplex system in terms of quality, but is designed for wider cabinets of 400mm and 450mm.

- Economical, solid and simple bin frame with 15L, 18L and 24L waste bucket options
- Drawer front connection with adjustment
- Its compact size maximizes space efficiency and its snug fit ensures stability
- Heavy duty bin carriage is manufactured from heavy gauge steel for added strength and durability
- 35kg carrying capacity

Cabinet widths are external measurements allowing for 16mm board on each side

Tanova Simplex Plus

TANOVA

Unique Feature

Bucket handles are designed to hold liner bags in place

Tanova Simplex Drawer Insert Systems

Tanova's Drawer Insert Systems are ideal for retrofitting as there's a model to suit most existing drawer brands.

- Unit comprises frame to sit into existing drawer plus plastic bins
- Solid steel frame with front-fixing points to provide support for the drawer front
- 470mm minimum internal drawer depth (front to back)
- Drawer front adjustment for a good fit
- When 550mm runners are used, bins clear drawer above for easy removal
- All models come complete with standard lids
- Models available that are compatible with LEGRABOX F drawers

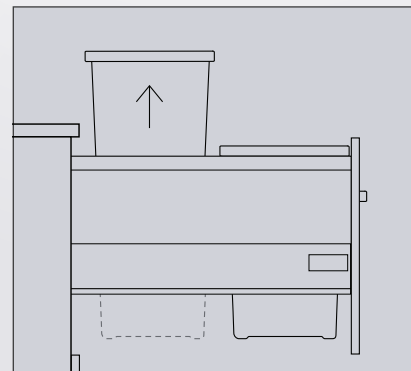

Mounting Options

Drawer Type

The drawer type allows access to bins with a single action and is the most popular type of system. The front panel is mounted directly onto a very strong carriage that opens like a drawer.

Handle Type

Mounted behind a hinged door, this model requires an extra 10mm in width and top hinge needs to be a minimum of 150mm from top of the cupboard door (unless sufficient clearance is made for the hinge).

Rear Bucket Clearance

Most Tanova models provide a minimum of 55mm clearance from front of cabinet to back of rear bucket/basket. Many models provide a greater clearance.

Silver Linings

Alternatives to Using Plastic Bags to Line Your Kitchen Bin

Single use plastic bags have been legislated against and, while changing our habits can be challenging, it's certainly nice to see fellow shoppers carrying bright and breezy fabric bags or hemp bags, or even old-school woven baskets!

- Even though plastic bags didn't even exist before the 1960s, many of us have become quite dependent on using those single use plastic supermarket bags to line their kitchen bins, so... what now? If you search 'alternatives to plastic bags' in your chosen search engine, you'll find a myriad of options, but here are just a few thoughts:
- Try paper bags (preferably with as high a recycle content as possible)
- Try folding your newspapers to line your bin; online you'll find instructions for a few ways to do this
- If you purchase bulk goods like rice, flour or pet food in large bags, use them
- Purchase bin liners from the supermarket; there are options available that are degradable or compostable, generally made from corn starch
- Go naked! Do you really need a bin liner? Most pull out kitchen bins have multiple buckets so you can easily separate food scraps from recyclables. You can then take recyclables to your outdoor recyclables bin, put food scraps on your compost heap (or feed the chooks, or give them to a neighbour for their compost). And, by the way, the buckets in Tanova pull out kitchen bins have a very smooth inside surface so they're easy to wipe out.

Useful Tips & Info

Paper and cardboard:

Recycling is better than composting, and composting is better than landfill.

Shop-bought bin liners: What do the labels mean?

Bio-based, plant-based, corn-starch or PLA: Bags are made from plants, not fossil fuels, but they are still plastic.

Certified compostable: Bags will break down in hot composting conditions (this is not the same as breaking down in the environment or in landfills).

Certified home compostable: Bags will break down in a home compost bin. No compostable plastic breaks down in the marine environment.

Oxo-degradable and oxo-biodegradable: Bags are made from fossil fuels and have an additive that makes them break down quickly, but they break down into microplastic and are generally considered worse than standard plastic bags.

No access to composting?

Worried about food scraps getting smelly? Keep them in the freezer until rubbish day!

Tanova FLEX

Highly Compatible Drawer Insert System for Slimwall Drawers

Concealed
Waste & Laundry
Systems

Tanova FLEX Drawer Insert System

For perfect integration with your slimline drawers

Tanova FLEX is a cleverly designed frame and bucket system that sits on your slim wall drawer, ensuring a consistent opening and closing action across the entire kitchen.

- Integrates perfectly with most slim wall soft closing drawer systems
- Easy to install in less than 5 minutes; no templates required
- Integrates with tip-on push to open or servo-drive slimwall drawers
- Tanova FLEX is designed with flat, easy-to-wipe surfaces
- No fiddly clip together or removable parts to get lost or damaged
- Available in Silk White and Umbra Grey for 300mm, 350mm, 400mm and 450mm cabinets
- Primarily designed for 500mm deep cutlery height drawers to keep costs down

Now available with or without a top cover panel for maximum flexibility

FLEX standard model unit shown on ALUNAN T drawer

FLEX base model unit

At TANOVA, we're not great fans of internal gravity lids. We believe the drawer front on your waste bin system seals odours in as effectively as a gravity lid (and avoids the need for yet another cleaning task). The top cover panel that is included with Tanova FLEX Standard units also provides a barrier between your cabinet and the bucket contents.

Tanova FLEX Drawer Insert System

At FIT, we're all for reducing cost and reducing waste, so we've made our Tanova FLEX units available without the top cover panel. Now, YOU choose the right FLEX option for your project.

Standard Units – Include Frame, Buckets & Top Cover Panel

Tanova

Laundry Systems

for Cabinets 300mm to 800mm

Concealed Laundry Systems with Plastic Hampers

With options in both Designer and Simplex specs, Tanova laundry systems with recyclable plastic baskets provide a durable, lightweight hamper with sturdy built in handles for easy carriage between wardrobe, bathroom, laundry and clotheslines.

- Stylish and svelte 36L capacity hampers designed and manufactured in New Zealand
- Blue and grey options depending on model
- Ergonomically shaped and positioned handles for easy lifting out of drawer system
- Vented on sides for airflow and breathability
- Solid bottom prevents drips into cabinetry

Concealed Laundry Systems with Steel Baskets

Tanova laundry produces systems with powder coated electro-galv steel baskets in Designer, Simplex Plus and Simplex specs.

- Electro-galv steel baskets
- Strong, durable and rigid
- Powder coated in Classic White
- 50L, 65L and 100L basket options, depending on cabinet size
- Optional top frame cover
- Optional basket divider assists with pre-wash sorting
- Solid bottom prevents drips into cabinetry

Create a laundry soak centre with Tanova TBF kitchen bins! This inspired solution comes from FIT's own Henry Don.

Have you seen all of FIT's storage solution catalogues?

Our collection of 6 catalogues covers our comprehensive range of storage solutions for kitchen, laundry, work-from-home spaces and more!

These catalogues provide in-use imagery alongside detailed information about specifications and variants available. You'll find lots of detail to assist your decision making process, and we're here to help if you need to know more!

Ask your designer, kitchen maker or cabinet maker for other FIT catalogues, or contact us directly and we'll be happy to send them to you; phone 09 431 0025 or email info@fit-nz.co.nz. Alternatively, you can view the interactive 'flipping books' by scanning the QR codes, or download the PDFs from the Catalogues page on our website: www.fit-nz.co.nz
